- CTR – Batch Filing allows the casino to create a batch files with a large number of CTRs
- SAR – Batch Filing allows the casino to create a batch files with a large number of SARs
- CTR - Discrete Filing allow the casino to integrate the Discrete Filing with ITCS Compliance system

## CAGE MANAGEMENT SOLUTION

- CHIP Walk Module – allows casino to track any Chip Up or Chip Down transactions done by the players or their Agents
- Trace the time the bank is given and returned by each dealer with automatic alerts on delays based on the schedule for the day of each individual. Easily block / unblock dealers from picking up the bank.
- Synchronize amounts due as decided by the rotation coordinator with amounts paid. With a simple card swipe, cashiers have complete transaction history of every dealer.
- Transparency on transactions - every operation at the cage is time stamped, uniquely identifying the user, the amount taken or returned and the purpose.
- Manage cashiers shifts, load balancing cage windows.
