# Benefits of using xDine™

## Easy Installation

We manage the entire onboarding and setup process. From building menus, to printer set up, our team is dedicated to configure xDine™ to work seamlessly with your existing operations.

## Integrated to the POS

xDine™ orders and payments are closed off on the POS automatically, so reconciliation is simple and orders display to where and when they're needed.

## Brand Friendly

Theme and embed xDine™ right into a website or mobile application. Restaurants get a unique URL and web application, so branding is never compromised by competitors.

## Always Improving

xDine™ makes a fantastic ordering experience for everyone, but improvements are always being made. Restaurants automatically get updates so no one is ever left behind.

## Secure & PCI Compliant

Built on Eigen's MiraServ™ Platform, an industry leading secure payments platform, restaurants can rest assured that cardholder data is safe and payments are PCI compliant.

## Conveniently Bundled

By using Eigen's MiraServ™ Platform, it is easy to add secure wired and wireless pay at the table solutions in addition to online ordering. Get one bundled price & one supplier to manage.

## Affordable Pricing

xDine™ has been competitively priced with a selection of packages to choose from. Pricing is based on a monthly fee structure and we do not take a percentage of sales.
